

Our Philosophy

The media have a strong influence on people's moral values. In the historical moment we live, the spirituality is a necessity. There is a personal spirituality, a social one (ethics is a face of it), a philosophical one. But there is also a spirituality that we reach through the entertainment. A film is a way of evangelization. Our Festival was created as an answer to the huge production of cinema and TV movies as well as television programmes inspired by the catholic confession. The wonderful history of the Church is something to be known. It is our roots. It is our history.
